

MEDIUM TAB-TENSION SCREEN

The new **MEDIUM Tab-Tension motorized screen** is the perfect screen for the **ultimate MEDIUM experience or the professional conference room**.

The sophisticated tab tension mechanism guarantees a **permanently perfectly flat screen surface** for excellent consistent light reflection. Supplied with a standard switch, a radio remote control with hand transmitter code no. 184931 can be ordered as optional accessory.

The compact and light-weight housing is made of **aluminium** and suited for a **wall or ceiling mounting**. The attractive design in modern RAL 9010 white color fits into every décor. The front-projection **screen surface is matt white type D** and made of PVC. Gain factor approx. 1.2 (DIN19045), light black backside.

A series of tabs along the sides of the material are linked via cord. This ensures at all times an equal amount of tension applied across the screens surface and thus a **totally flat, ripple free image**.
